## What is Maine KIDS COUNT?

Maine KIDS COUNT, a project of the Maine Children's Alliance, is part of the national KIDS COUNT network, a state-by-state effort funded by the Annie E. Casey Foundation to track the status of children across the United States. Since 1994, the Maine KIDS COUNT project has published the annual Maine KIDS COUNT data book using the most current data available on the well-being of children in the areas of physical and mental health, social and economic status, and education and learning. The indicators for this data book have all met the following criteria for inclusion:

The indicator must be from a reliable source
The indicator must be available and consistent over time
The indicator must be easily understandable to the public
The indicator must reflect an important outcome or measure of children's well-being
The indicators, as a group, should represent children of all ages
In addition to publishing the Maine KIDS COUNT data book, we continue to maintain an online database of all KIDS COUNT data that is accessible by the public. From our website, users can link to an interactive database and easily create trends, maps, and rankings of county-level indicators. Go to www.mekids.org, click on "Maine KIDS COUNT," then "Online KIDS COUNT Databases," and "CLICKS Online Database."

## How to Use This Book

In order to assess our present standing and to evaluate our progress over time, it is essential to understand what is being measured and how. The DEFINITIONS AND SOURCES OF DATA section, in the back of the book, provides a comprehensive definition of each indicator, an explanation of how and by whom it is collected and measured, as well as web addresses with direct links to data and data sources. Some of the data presented are from several years earlier, as those indicators require a longer time to compile. Furthermore, from time to time various reporting agencies change how they collect, analyze and/or report their various indicators. We note those changes, where appropriate.

For every indicator in the book we report a percentage or rate and, whenever available, a number.* It is essential to present the indicators as percents or rates in order to enable comparison between groups of different population size (i.e., different counties), and we certainly like to know the number of children represented by any indicator.

## CALCULATING RATES

Percentages and rates are measures of the probability of an event. They both take into account the total population of children who could experience that event. Whenever possible, the denominator (the population that could experience the event) corresponds to the year for which the event is reported; but when that is not possible, we use the most recent year for which population data are available. Rates that include a " $\%$ " sign are percents, or rates per 100 events. Other rates are expressed per $1,000,10,000$, or 100,000 events. The generic formula for calculating rates or percents is:

$$
\frac{\text { (number of occurrences) } \times(\text { base rate })}{\text { population }}
$$

For example, in 2005 there were 1,346 babies born preterm (before the 37th week of gestation) of the 14,111 live births in 2005 . This translates to a rate of $9.5 \%$. This rate is calculated as follows:

$$
\frac{(1,346 \text { preterm babies }) \times 100}{|4,|| | \text { babies born }}=9.5 \%
$$

* When a number is not available or not applicable, nla is used.

Kristi Sarchi

## Indicators at a Glance

## MEASURES NEEDING IMMEDIATE ATTENTION

## POVERTY: Page 15

$20 \%$ of children under age 5 and $17 \%$ of children under age 18 are living in poverty.

## INCOME AND EMPLOYMENT : Page 16

$39 \%$ of children under age 18 live in low-income families (family income below 200\% of the federal poverty level).

HEALTH INSURANCE: Page 7
$10 \%$ of low-income children are without health insurance even though they are eligible for MaineCare. These children represent $56 \%$ of uninsured children.

## MEASURES SHOWING IMPROVEMENT

## DISCONNECTED YOUTH : Page 20

The percentage of Maine teens who are not attending school and not working decreased from $7 \%$ in 2005 to $5 \%$ in 2006.

## YOUTH RISK BEHAVIORS : Page 12

High school students in Maine continue to report a reduction in the use of cigarettes, alcohol, and marijuana according to the 2007 Maine Youth Risk Behavior Survey. Between 2001 and 2007 cigarette use declined from $25 \%$ to $14 \%$, alcohol use declined from $48 \%$ to $39 \%$, and marijuana use declined from $27 \%$ to $22 \%$.

The percentage of Maine high school students who report attempting suicide has decreased from 6\% in 2005 to 5\% in 2007.

ADOLESCENT HEALTH AND SAFETY : Page 10
Arrests of Maine drivers under age 20 for Operating Under the Influence decreased between 2004 and 2005, from 29.4 arrests per 1,000 drivers under age 20 to 27.2 arrests.

## MEASURES SHOWING MIXED PROGRESS

## TEEN PREGNANCY: Page 17

Maine's repeat teen pregnancy rate decreased from $26 \%$ in 2004 to $24 \%$ in 2005.
During this same time period, the teen pregnancy rate increased slightly and the teen birth rate remained the same.

## Physical and Mental Health

## HEALTH INSURANCE

Children without health insurance, 2004-2006 and 2003-2005 annual average (as \% of children ages 0-18)
Low-income children without health insurance, 2004-2006 and 2003-2005 annual average (as \% of low-income children ages 0-18)

PHYSICAL HEALTH
Live births for which prenatal care began in the first trimester, 2005 and 2004 (as \% of live births)

| Low birth-weight infants, 2005 and 2004 (as \% of live births) | 963 | 6.8\% | 6.4\% | 8.2\% |
| :---: | :---: | :---: | :---: | :---: |
| Preterm births, 2005 and 2004 (as \% of live births) | 1,346 | 9.5\% | 9.1\% | 12.7\% |
| Immunizations of children, 2006 and 2005 (as \% of children ages 19-35 months) | n/a | 75.7\% | 75.8\% | 77.0\% |
| MORTALITY |  |  |  |  |
| Infant mortality, 2001-2005 and 2000-2004 annual average (rate per 1,000 live births) | 77 | 5.6 | 5.2 | 6.8 |
| Child deaths, 2001-2005 and 2000-2004 annual average (rate per 10,000 children ages I-14) | 41 | 1.9 | 2.0 | 2.0 |
| Teen deaths, 2001-2005 and 2000-2004 annual average (rate per 10,000 children ages 15-19) | 56 | 6.0 | 6.0 | 6.6 |

Health insurance is just one of many social and economic factors that influence children's health and well-being. Research has shown that children with health insurance are more likely to have better access to health care, which increases the chances that their health problems will be identified and treated.* Health problems that are left untreated, even common childhood illnesses, such as asthma and ear infections, can have negative consequences in childhood and later on in life.**

## In Maine:

An estimated $56 \%$ of uninsured children are low-income children who are eligible for MaineCare coverage.

| Outpatient hospital visits for attempted suicide, 2005 and 2004 (rate per 1,000 children ages 10-19) | 644 | 3.6 | 3.5 | n/a |
| Children ages 10-14 (rate per 1,000 children ages 10-14) | 129 | 1.6 | 1.2 | n/a |
| Children ages 15-19 (rate per 1,000 children ages 15-19) | 509 | 5.4 | 5.4 | n/a |

MENTAL HEALTH/SUBSTANCE ABUSE DIAGNOSES
200I-2005, outpatient hospital visits, ages 0-I9

## ATTEMPTED SUICIDE

200I-2005, outpatient hospital visits, ages 10-19

Source: Maine Health Data Organization

For children and adolescents, good mental health is the achievement of developmental cognitive, social, and emotional milestones that result in secure attachments, satisfying social relationships, and effective coping skills. Children's behavior at home and school, their academic performance, and their ability to participate in community life is directly influenced by their mental health.* Alcohol abuse by adolescents has been linked to emotional and behavior problems,** and illicit drug abuse has been linked to an increased risk of suicide. ${ }^{* * *}$

## In Maine:

The rate of outpatient hospital visits for mental health/substance abuse diagnoses has decreased $16.3 \%$, from 126.5 visits per 1,000 children ages $0-19$ in 2004 to 105.9 visits in 2005.

[^0]| CHILD WELFARE | MAINE |  |  | NATIONAL |
| :---: | :---: | :---: | :---: | :---: |
|  | State Number | Current Rate | Previous Rate | Rate or Percent |
| Children in Department of Health and Human Services care or custody, December 2007 and 2006 (rate per 1,000 children ages 0-17) | 2,012 | 7.3 | 7.2 | n/a |
| Substantiated child abuse and neglect victims, 2006 and 2005 (rate per 1,000 children ages 0-17) | 3,664 | 13.2 | 11.7 | n/a |
| Reports alleging child abuse and/or neglect, 2006 and 2005 | 18,869 | n/a | n/a | n/a |
| Reports screened out (as \% of reports alleging maltreatment) | 10,234 | 54.2\% | 55.1\% | n/a |
| Reports that warranted child protective services (as \% of reports alleging maltreatment) | 8,635 | 45.8\% | 44.9\% | n/a |
| Cases assigned to Child Protective Services (as \% of reports warranting services) | 6,234 | 72.2\% | 67.0\% | n/a |
| Cases assigned to a contract agency (as \% of reports warranting services) | 2,401 | 27.8\% | 33.0\% | n/a |
| Case assessments completed by Child Protective Services, 2006 and 2005 | 6,462 | n/a | n/a | n/a |
| Cases without findings of maltreatment (as \% of completed case assessments) | 4,100 | 63.4\% | 63.4\% | n/a |
| Cases with findings of maltreatment (as \% of completed case assessments) | 2,362 | 36.6\% | 36.6\% | n/a |

Young children who experience maltreatment frequently have disruptions in brain development that result in impaired physical, mental, and emotional development.*

Older children who have experienced maltreatment frequently perform poorly in school; commit crimes, including crimes against persons; and experience emotional problems, such as depression, suicidal thoughts, and alcohol and substance abuse.**

Adults who have been maltreated as children are at an increased risk of smoking, alcoholism, drug abuse, eating disorders, severe obesity, depression, suicide, sexual promiscuity, and certain chronic diseases. ${ }^{* * *}$

## In Maine:

In 2006, 3,664 children ages $0-17$ were substantiated victims of child abuse and/or neglect. For many of these children, the consequences of maltreatment will be poor physical, emotional, and social outcomes in childhood and as adults.

## LEADING CAUSE OF DEATH

2005, ages I5-19

| CAUSE |
| :--- |
| Unintentional injury . . . . . . . . . . . . . . . . . . . . . . 37 |
| OF DEATHS |

Of the 37 unintentional injuries:

| CAUSE | NUMBER OF DEATHS |
| :---: | :---: |
| Motor vehicle traffic | 26 |
| Poisoning |  |
| Drowning. |  |
| Fall |  |
| Fire/burn |  |
| Other land transport. |  |
| Suffocation. |  |

Adolescence is a time of rapid growth and change, of increasing independence and developing self-knowledge, thus making it an important and challenging time of transition. While most teens manage these important years with relative success, others face problems that undermine their physical and emotional wellbeing, and some do not survive the teen years.*

## In Maine:

The leading cause of death for adolescents ages $15-19$ is unintentional injuries. In 2005, deaths from motor vehicle traffic accidents accounted for $70 \%$ of these injuries. Factors that contribute to deaths from motor vehicle accidents include teens' willingness to take risks, alcohol use, failure to wear seatbelts, and -due to their lack of experience-inability to estimate dangers in hazardous situations and to cope with them when they arise.*

[^3] .

ALCOHOL, MARIJUANA AND CIGARETTE USE
1995-2007, high school students

Addictive disorders in adults most commonly begin in adolescence or young adulthood: most adult smokers begin smoking before age 18 , more than $40 \%$ of adult alcoholics experience alcohol-related symptoms between ages $15-19$, and the median age at which adults with substance use disorders begin using illegal drugs is $16 .{ }^{*}$

## In Maine:

Since 2001, there has been a steady decrease in the percentage of high school students who report using alcohol, marijuana, and cigarettes.

Washington. . . . . .

Poverty plays a key role in children's wellbeing and is related to every KIDS COUNT indicator. Children who live in poverty, especially those who live in poverty for long periods of time, are at an increased risk for poor health, cognitive, social, and educational outcomes. They are more likely to have physical, behavioral, and emotional health problems; to have difficulty in school; to become teen parents; and, as adults, to earn less.*

## In Maine:

Childhood poverty varies widely across Maine's sixteen counties, from a low of $12.2 \%$ in Cumberland County to a high of $28.4 \%$ in Washington County.

[^7]

| 16 (most) | Piscataquis | 57.0\% |
|  | MAINE STATE | 37.5\% |

[^9]Children who live in families with food insecurity and hunger are sick more often, are more likely to have ear infections, have higher rates of iron deficient anemia, and are hospitalized more frequently. As a result of their poor health, they miss more days of school and are less prepared to learn when they are present. Children at risk for hunger are more likely to have poorer mental health, be withdrawn or socially disruptive, and have higher rates of behavioral disorders.*

## In Maine:

In 2007, the Food Stamp Benefits program, the Subsidized School Lunch program, and the WIC program all had an increase in the percentage of children participating in the program. The biggest increase was in the Food Stamp Benefits program, which increased from $20.4 \%$ in 2006 to $23.7 \%$ in 2007.

[^10]| TEEN PREGNANCY | MAINE |  |  | NATIONAL |
| :---: | :---: | :---: | :---: | :---: |
|  | State Number | Current Rate | Previous Rate | Rate or Percent |
| Births to single teenaged mothers, 2005 and 2004 (as \% of total live births) | 971 | 6.9\% | 6.9\% | n/a |
| Births to married teenaged mothers, 2005 and 2004 (as \% of total live births) | 151 | I.1\% | 1.0\% | n/a |
| Repeat teen pregnancies, 2005 and 2004 (as \% of total teen pregnancies) | 393 | 24.2\% | 25.9\% | $\mathrm{n} / \mathrm{a}$ |
| Births to single teens who have not completed 12 years of school, 2001-2005 and 2000-2004 annual average (rate per 1,000 females ages 10-19) | 531 | 6.1 | 6.3 | n/a |
| Teen pregnancies, 2005 and 2004 (rate per 1,000 females ages (0-17) | 491 | 7.3 | 6.9 | n/a |

Births to teens affect both the teen mother and her child. Teens who become mothers are more likely to drop out of school and to live in poverty. Their children are more likely to be born at a low birth-weight, to experience health problems and developmental delays, and to experience abuse and/or neglect. The first step in reducing the teen birth rate is to reduce the teen pregnancy rate.*

## In Maine:

The teen pregnancy rate rose slightly between 2004 and 2005, from 6.9 pregnancies per 1,000 females ages $10-17$ to 7.3 pregnancies.

> * Shore, R. July 2005. KIDS COUNT Indicator Brief: Reducing the Teen Birth Rate. www.kidscount.org/datacenter/auxiliary07.jsp

## CRIME

There are many risk factors that increase the likelihood that a young person will become involved with the juvenile justice system, and the more risk factors a child faces, the greater is that likelihood. A few of these risk factors are poor cognitive development, associating with deviant peers, parental antisocial or criminal behavior, and poverty.*

## In Maine:

Between 1997 and 2006, the overall arrest rate of children ages $10-17$ decreased $37 \%$ from 88.2 arrests per 1,000 children to 55.9 arrests.

| HEAD START |  |  |  |  |
| Children enrolled in Head Start programs, FFY 2007 and 2006 (as \% of eligible children) | 4,016 | 30.5\% | 32.3\% | n/a |
| Children estimated to be eligible for Head Start but not enrolled (as \% of eligible children) | 9,146 | 69.5\% | 67.7\% | n/a |

Head Start is a national, comprehensive, early education program. The program is designed to prepare children to be ready for and to succeed in kindergarten. Children under age 5 are eligible if they live in poverty or if they have disabilities. In addition to providing child care and education, the Head Start program offers health and dental screenings and services, mental health support, and family advocacy.*

## In Maine:

Every year for the past eight years, approximately two-thirds of Head Start eligible children have not been enrolled in a Head Start program. In 2007, an estimated $69.5 \%$ of eligible children were not enrolled in a program.

DISCONNECTED YOUTH
2000-2006, ages I6-19

Source: U.S. Census Bureau, American Community Surveys, 2000-2006

Teens who are neither in school nor employed are disconnected from the roles and relationships that help young people transition to adulthood. These young people tend to have a harder time connecting to the job market as young adults, which increases the risk that they will have lower earnings and a less stable employment history than their peers who stayed in school or found jobs.*

## In Maine:

The percentage of teens ages 16-19 who are neither in school nor employed has decreased from $7 \%$ in 2005 to $5 \%$ in 2006.

[^14]
## STUDENTS

 WITH DISABILITIES2006-07, ages 3-2I, by gender

Source: Maine Department of Education, Office of Special Services

Special education and related services are an integral part in educating children with special needs and in improving their longterm outcomes. These services improve student achievement and graduation rates, increase participation in post-secondary education, and increase employment participation and wages.*

## In Maine:

Between 1992 and 2004, Maine experienced a gradual but steady increase in the rate of children with special needs from $13.4 \%$ to $18.4 \%$. This rate decreased slightly in 2005 to $18.1 \%$ and then again in 2006 to $17.6 \%$.

## County Profiles

Children ages 0-17 represented just over one-fifth or $21 \%$ of the total population of Maine in 2005. Not surprising, the majority of these children live in counties with large urban areas: Cumberland, York, Penobscot, Kennebec, and Androscoggin.

County-level data offers us an opportunity to more fully understand the well-being of Maine's children and their families. For each of the indicators reported, the number of events and rate of occurrence for those events offer us a more comprehensive view of the well-being of children around the state. The number and rates may vary considerably from year to year and between counties-a reflection of Maine's relatively small population and the diversity in population size, geography, and economic and social climate in the various regions of Maine, and should be considered when interpreting differences.

## Definitions and Sources of Data

## Demographics

SOURCE: Population estimates for calendar year 2005 were provided by Maine Department of Health and Human Services, Office of Data, Research and Vital Statistics

## INTRODUCTION

Children by family type is the percentage of children under age 18 who live with their own (by birth, marrriage or adoption) married-parents or single-parent, with grandparents, with foster parents or other unrelated adult, or with other relatives. These data represent calendar year 2006.
SOURCE: U.S. Census Bureau, 2006 American Community Survey
http://factfinder.census.gov

Families with children by income level is the percentage of families with related children under age 18 with incomes below $100 \%$ of poverty ( $\$ 16,242$ for a single-parent with two children and $\$ 20,444$ for a family of four with two children), between $100 \%$ and $199 \%$ of poverty, between $200 \%$ and $249 \%$ of poverty, and $250 \%$ and greater of poverty. "Related children" include the householder's (head of household) children by birth, marriage, or adoption; as well as other persons under age I8 (such as nieces and nephews) who are related to the householder and living in the household. These data represent calendar year 2006.
SOURCE: Population Reference Bureau, analysis of 2006 American Community Survey.

## PHYSICAL AND MENTAL HEALTH

## HEALTH INSURANCE

Children without health insurance is the estimated number and percent of children ages $0-18$ who were not covered by any kind of public or private health insurance. These data are averaged over the three-year period from 2004-2006 and 2003-2005.
SOURCE: U.S. Census Bureau, Current Population Survey (March supplement), 2005 through 2007 and 2004 through 2006

Low-income children without health insurance is the estimated number and percent of children ages $0-18$ who lived in families with incomes less than twice the federal poverty threshold ( $<200 \%$ of poverty) and who lacked health insurance. These data are averaged over the three-year period from 2004-2006 and 2003-2005. In 2005, the midpoint of the 3year average for the current rate, the poverty threshold for a typical family of three was $\$ 15,577$. Thus, "low-income" represents income of less than $\$ 31$, 154 for a family of three.
SOURCE: U.S. Census Bureau, Current Population Survey (March supplement), 2005 through 2007 and 2004 through 2006.

Children participating in MaineCare is the number and percent of individual children ages 0-18 participating in MaineCare in state fiscal year (SFY) 2007 (July I, 2006 - June 30, 2007). These data are reported by the child's county of residence at the end of the SFY or the end of the child's participation in the program. Note that the statewide figure includes 2,258 children who were non-residents, who were out-of-state, or whose residence is unknown. Note:The previous rate is not presented because the method for reporting the data has changed.

SOURCE: Maine Department of Health and Human Services, Office of MaineCare Services.

## PHYSICAL HEALTH

Live births for which prenatal care began in the first trimester is the number and percent of live births for which the mother began receiving prenatal care during the first three months of pregnancy. These data represent calendar years 2005 and 2004.

SOURCE: Maine Department of Health and Human Services, Office of Data, Research and Vital Statistics.

Low birth-weight infants is the number and percent of live births in which the newborn weighed less than 2500 grams, ( 5.5 pounds). These data represent calendar years 2005 and 2004.
SOURCE: Maine Department of Health and Human Services, Office of Data, Research and Vital Statistics; 2005 national rate from Centers for Disease Control, National Center for Health Statistics. National Vital Statistics Report, Vol. 56, No. 6. "Births: Final data for 2005." http://www.cdc.gov/nchs/data/nvsr/nvsr56/nvsr56_06.pdf

Pre-term births is the number and percent of pre-term births in which the newborn was born at less than 37 weeks gestation. These data represent calendar years 2005 and 2004.
SOURCE: Maine Department of Health and Human Services, Office of Data, Research and Vital Statistics; 2005 national rate from Centers for Disease Control, National Center for Health Statistics. National Vital Statistics Report, Vol. 56, No. 6. "Births: Final data for 2005." http://www.cdc.gov/nchs/data/nvsr/nvsr56/nvsr56_06.pdf

Immunizations of children is the estimated vaccination coverage of children ages 19-35 months with the 4:3:1:3:3:1 Series (4 doses of DTP (Diphtheria-Tetanus-Pertussis) vaccine, 3 doses of poliovirus vaccine, I dose of MMR (Measles-Mumps-Rubella) vaccine, 3 doses of Haemophilus influenzae type $b$ (Hib) vaccine, 3 doses of hepatitis $B$ vaccine, and I dose of varicella (Chickenpox) vaccine). These data represent calendar years 2006 and 2005.

SOURCE: Centers for Disease Control and Prevention, National Immunization Survey, 2006 and 2005. http://www.cdc.gov/vaccines/stats-surv/imz-coverage.htm\#nis

Pediatricians, Family Practitioners, and General Practitioners is the number and rate of licensed and board certified pediatricians, family practitioners, and general practitioners (allopaths/MDs and osteopaths/DOs) in Maine. The rate is per 1,000 children ages $0-17$. These data are from the Health Manpower Resource Inventory, a survey enclosed with relicensure application and returned on a voluntary basis by the licensee to the respective board (Board of Licensure in Medicine for MDs, and Board of Osteopathic Licensure for DOs). These data represent calendar years 2004 and 2002.
SOURCE: Maine Department of Health and Human Services, Office of Data, Research and Vital Statistics, Maine Cooperative Health Manpower Resource Inventory, Physicians: 2004, and Maine Cooperative Health Manpower Resource Inventory, Physicians: 2002.

General Practice Dentists is the number and rate of licensed, active general practice dentists in Maine. The rate is per I,000 total population. These data represent calendar years 2006 and 2002.

SOURCE: Maine Department of Health and Human Services, Office of Data, Research and Vital Statistics, Maine Cooperative Health Manpower Resource Inventory, Dentists: 2006 (http://www.maine.gov/dhhs/bohodr/odrvs.htm), and Maine Cooperative Health Manpower Resource Inventory, Dentists: 2002.

## MORTALITY

Infant mortality is the number and rate of deaths of infants under I year of age. The rate is per 1,000 live births. These data are averaged over the five-year period from 200I-2005 and from 2000-2004 and are reported by place of residence, not place of death.

SOURCE: Maine Department of Health and Human Services, Office of Data, Research and Vital Statistics; 2005 national rate from the Annie E. Casey Foundation's KIDS COUNT State-Level Data Online website. www.kidscount.org/datacenter/

Child deaths is the number and rate of deaths of children ages I-I4 from all causes. The rate is per 10,000 children ages $1-14$. These data are averaged over the five-year period from 2001-2005 and from 2000-2004 and are reported by the child's place of residence, not the place of death. SOURCE: Maine Department of Health and Human Services, Office of Data, Research and Vital Statistics; 2005 national rate from the Annie E. Casey Foundation's KIDS COUNT State-Level Data Online website. www.kidscount.org/datacenter/

Teen deaths is the number and rate of deaths of teens ages $15-19$ from all causes. The rate is per 10,000 children ages $15-19$. These data are averaged over the five-year period from 2001-2005 and from 2000-2004 and are reported by the child's place of residence, not the place of death. SOURCE: Maine Department of Health and Human Services, Office of Data, Research and Vital Statistics; 2005 national rate from the Annie E. Casey Foundation's KIDS COUNT State-Level Data Online website. www.kidscount.org/datacenter/

## MENTAL HEALTH

Outpatient hospital visits for mental health or substance abuse diagnoses is the number and rate of outpatient hospital visits of children ages 0-19 with a principal diagnosis of mental disease/disorder, alcohol/drug use or alcohol/drug-induced organic mental disorders. The rate is per 1,000 children ages $0-19$. These data represent calendar years and count hospital visits, not individual children.

SOURCE: Maine Health Data Organization.

Outpatient hospital visits for attempted suicide is the number and rate of outpatient hospital visits of children ages $10-19$ with a principal diagnosis of an injury and an E Code categorizing the cause of injury as suicide/self-inflicted (E950-E959). The rate is per I,000 children ages 1019. These data represent calendar years and count hospital visits, not individual children.

SOURCE: Maine Health Data Organization.

## CHILD WELFARE

## Children in Department of Health and Human Services care or

 custody is the number and rate of children ages $0-17$ in the care or custody of the Department of Health and Human Services (DHHS) in December 2007 and 2006. The rate is per I,000 children ages $0-17$. These children were ordered into DHHS custody as a result of a child protection hearing where the child is found to be in jeopardy, a juvenile hearing where it would be contrary to the child's health and welfare to remain in the care or custody of the parents, or a divorce and/or custody hearing where neither parent has been found able to provide a home in the best interest of the child.SOURCE: Maine Department of Health and Human Services, Office of Child and Family Services, Division of Child Welfare Services.

Substantiated child abuse and neglect victims is the number and rate of individual victims of child abuse and neglect ages $0-17$ for whom assessment led to a finding of a threat to a child's health or welfare by physical, mental or emotional injury or impairment, sexual abuse or exploitation, deprivation of essential needs or lack of protection from these by a person responsible for the child ( 22 MRSA §4002). The rate is per 1,000 children ages 0-17.These data represent calendar years 2006 and 2005.

SOURCE: Maine Department of Health and Human Services, Office of Child and Family Services, Division of Child Welfare Services.

Reports alleging child abuse and/or neglect is the number of written or verbal requests for Child Protective Services intervention in a family situation on behalf of a child in order to assess or resolve problems being presented. Cases were screened out when evidence of serious family problems or dysfunction was evident but the situation did not contain an allegation of abuse or neglect. Cases deemed appropriate for referral meet the standards contained in 22 MRSA §4002 as defined under the definition for substantiated child abuse and neglect victims. Of the cases deemed appropriate for referral to services, some are referred to Child Protective Services and others are referred to community agencies that contract with the Department of Health and Human Services to provide services to families. These data represent calendar years 2006 and 2005
SOURCE: Maine Department of Health and Human Services, Office of Child and Family Services, Division of Child Welfare Services.

Case assessments completed by Child Protective Services is the number of case assessments completed during 2006 and 2005 of those cases referred to Child Protective Services. The results of case assessments are cases with findings of maltreatment or cases without findings of maltreatment.
SOURCE: Maine Department of Health and Human Services, Office of Child and Family Services, Division of Child Welfare Services.

## ADOLESCENT HEALTH AND SAFETY

Adolescents served in the Maine family planning system is the number and rate of adolescents ages $15-19$ served in the Maine family planning system during state fiscal year (SFY) 2006 (July I, 2005 - June 30, 2006) and during SFY 2005 (July I, 2004 - June 30, 2005). The rate is per I,000 children ages 15-19. These data are also reported by number and by rate for gender.

## SOURCE: Family Planning Association of Maine. Region I Title $\times$ Data System.

Young adults living with HIV/AIDS is the number and rate of reported cases of youth ages 18-24 living with the Human Immunodeficiency Virus $(\mathrm{HIV})$ and Acquired Immune Deficiency Syndrome (AIDS). The rate is per I,000 young adults ages 18-24. These data represent calendar years 2006 and 2005.

SOURCE: Maine Department of Health and Human Services, Maine Center for Disease Control and Prevention, HIV/STD Program.

Chlamydia cases is the number and rate of reported cases of Chlamydia among children and adolescents ages 10-19.The rate is per 1,000 children ages 10-19. These data represent calendar years 2006 and 2005. SOURCE: Maine Department of Health and Human Services, Maine Center for Disease Control and Prevention, HIV/STD Program.

Gonorrhea cases is the number and rate of reported cases of gonorrhea among children and adolescents ages $10-19$. The rate is per 1,000 children ages 10-19. These data represent calendar years 2006 and 2005. SOURCE: Maine Department of Human Services, Bureau of Heath, HIVISTD Program

Children and adolescents using services of licensed alcohol and drug abuse treatment providers is the unduplicated number and rate of children ages $10-19$ using services of Maine alcohol and drug abuse treatment providers. These data include children whose primary problem is substance abuse, affected others (such as children of parents with substance abuse problems requiring therapy), and evaluation only. The rate is per 1,000 children ages $10-19$. These data represent calendar years 2006 and 2005.

SOURCE: Maine Department of Health and Human Services, Office of Substance Abuse, Treatment Data System (TDS).

OUI Arrests, License Suspensions and Convictions is the number and rate of arrests, license suspensions, and convictions of drivers under age 20 for Operating Under the Influence. Arrests represent implied consent statistics from the Bureau of Motor Vehicles of drivers who took or refused to take a blood alcohol test. License suspensions represent administrative suspensions issued by the Bureau of Motor Vehicles and suspensions issued by the courts. Convictions represent drivers convicted for Operating Under the Influence. The rate is per 1,000 drivers under age 20. These data represent calendar years 2005 and 2004.
SOURCE: Department of the Secretary of State, Bureau of Motor Vehicles. http://www.state.me.us/sos/bmv

Children in motor vehicle crashes with personal injury is the number and percent of children ages $0-19$ injured in a motor vehicle crash where a young person was involved. Children in motor vehicle crashes include young drivers, vehicle passengers, and pedestrians or bicyclists. These data represent calendar years 2006 and 2005. Note: 2006 data are preliminary.
SOURCE: Maine Department of Transportation, Safety Office.
Leading Cause of Death is the number for the 10 leading causes of death of adolescents ages 15 - I 9 . These data also include a breakout by number of unintentional injury deaths by cause of injury. These data represent calendar year 2005.
SOURCE: Centers for Disease Control, National Center for Injury Prevention and Control, WISQARS Leading Cause of Death Reports, 2005.
http://webapp.cdc.gov/sasweb/ncipc/leadcaus I O.html
Motor vehicle deaths is the death rate of children and teens ages 15-19 who were killed in motor vehicle crashes. These data represent rolling five-year averages from 1992-1996 through 2001-2005. The rate is per 100,000 children ages 15-19. Note: For years prior to 1999 ICD-9 codes E8 I 0-E825 are used, and for years 1999 and forward ICD- 10 codes V02V04,V09.0, V09.2, VI2-VI4,VI9.0-VI9.2, VI9.4-VI9.6,V20-V79, V80.3-V80.5, V8I.0-V8I.I,V82.0-V82.I,V83-V86,V87.0-V87.8,V88.0V88.8,V89.0,V89.2 are used.
SOURCE: Maine Department of Health and Human Services, Office of Data, Research and Vital Statistics; 2004 national rate from Centers for Disease Control, Wonder System, Mortality Query Results for ICD-10 codes (see above) for children ages 15-19. http://wonder.cdc.gov/mortlCD I 0).html

Child and teen suicides is the suicide rate of children and teens ages 10 19.These data represent rolling five-year averages from 1992-1996 through 2001-2005. The rate is per 100,000 children ages 10-19. Note for years prior to 1999 ICD-9 codes E950-E959 are used, and for years 1999 and forward ICD-I0 codes X60-X84 and X87.0 are used.

SOURCE: Maine Department of Health and Human Services, Office of Data, Research and Vital Statistics; 2004 national rate from Centers for Disease Control, Wonder System, Mortality Query Results for ICD-10 codes (see above) for children ages 10-14 and 15-19. http://wonder.cdc.gov/mortICD I 0).html

Youth Risk Behavior Surveillance data is selected results from the Maine and National Youth Risk Behavior Surveys. Youth Risk Behavior Surveys monitor priority health-risk behaviors that contribute to the leading causes of death, injury, illness, and social problems among youth at the state and national levels.
SOURCE: Maine Department of Education and Maine Department of Health and Human Services, Coordinating School Health Programs, "2007 Maine Youth Risk Behavior Survey Results" and "2005 Maine Youth Risk Behavior Survey Results." http://www.mainecshp.com 2005 national rates from the Youth Risk Behavior Surveillance - Centers for Disease Control. http://www.cdc.gov/

## SOCIAL AND ECONOMIC STATUS

## INCOME AND EMPLOYMENT

Children under age 18 in poverty is the estimated number and percent of children under age 18 living in poverty. For 2005, the estimates are modeled from combined census estimates, the 2005 American Community Survey, and other administrative and economic data. In 2005, which represents the current rate, the poverty threshold for a typical family of three was $\$ 15,577$. For 2004 and previous years, the estimates are modeled from combined census estimates, Current Population Surveys, and other administrative and economic data. These data represent calendar years. Note: 2005 SAIPE estimates are not directly comparable to 2004 and previous years because the data used to model the estimates has changed.
SOURCE: U.S. Census Bureau, Small Area Income and Poverty Estimates, 2005. http://www.census.gov/hhes/www/saipe/

Children under age 5 in poverty is the estimated number and percent of children under age 5 living in poverty. For 2005, the estimates are modeled from combined census estimates, the 2005 American Community Survey, and other administrative and economic data. In 2005, which represents the current rate, the poverty threshold for a typical family of three was $\$ 15,577$. For 2004 and previous years, the estimates are modeled from combined census estimates, Current Population Surveys, and other administrative and economic data. These data represent calendar years. Note: 2005 SAIPE estimates are not directly comparable to 2004 and previous years because the data used to model the estimates has changed.
SOURCE: U.S. Census Bureau, Small Area Income and Poverty Estimates, 2005. http://www.census.gov/hhes/www/saipe/

Children in low-income families is the estimated number and percent of children under age 18 who live in families with incomes less than twice the federal poverty threshold (<200\% of poverty). In 2006, which represents the current rate, the poverty threshold for a typical family of three was $\$ 16,079$. Thus, "low-income" represents income of less than $\$ 32,158$ for a family of three. These data represent calendar years 2006 and 2005.
SOURCE: Annie E. Casey Foundation's, KIDS COUNT State-Level Data Online website. www.kidscount.org/datacenter/

Median income of families with children is the estimated median annual income for families with related children under age 18 living in the household. "Related children" include the householder's (head of household) children by birth, marriage, or adoption; as well as other persons under age 18 (such as nieces and nephews) who are related to the householder and living in the household. The median income is the dollar amount that divides the income distribution into two equal groups - half with income above the median and half with income below it. These data represent December 2006 and 2005.

SOURCE: U.S. Census Bureau, American Community Survey, 2006 and 2005.
Median household income is the estimated median household income. These estimates are modeled from combined census estimates, the 2005 American Community Survey, and other administrative and economic data. For 2004 and previous years, the estimates are modeled from combined census estimates, Current Population Surveys, and other administrative and economic data. The median income is the dollar amount that divides the income distribution into two equal groups - half with income above the median and half with income below it. These data represent calendar year 2005 and 2004. Note: 2005 SAIPE estimates are not directly comparable to 2004 and previous years because the data used to model the estimates has changed.
SOURCE: U.S. Census Bureau, Small Area Income and Poverty Estimates, 2005. http://www.census.gov/hhes/www/saipe/

Estimated livable wage for a single-parent family of three is the estimated hourly wage required to meet basic expenses for a singleparent, three-person family. A livable wage is calculated by dividing the total expenses in a basic needs budget by the number of hours that make up a year of full-time work. These data represent calendar years 2006 and 2004.

SOURCE: Maine Center for Economic Policy, Getting By: Maine Livable Wages in 2006 (June 2007), and Getting By: Maine Livable Wages in 2004 (October 2005). www.mecep.org

Unemployment is the estimated annual monthly average number and percent of people in the civilian labor force who are unemployed. The unemployment rate is calculated by dividing the average number of unemployed people by the average number of people in the civilian labor force. These data represent calendar years 2006 and 2005.
SOURCE: Maine Department of Labor, Bureau of Employment Security, Division of Labor Market Information Services, Local Area Unemployment Statistics Program (LAUS). Civilian Labor Force Estimates for Maine and Maine Counties, By Month and Annual Average, 2006, and Civilian Labor Force Estimates for Maine and Maine Counties, By Month and Annual Average, 2005. Available at http://www.state.me.us/labor: 2006 national data from the Bureau of Labor Statistics, Local Area Unemployment Statistics Program (LAUS).Table I: Employment status of the civilian non-institutional population 16 years of age and over by region, division, and state, 2005-2006 annual averages.
http://stats.bls.gov/news.release/srgune.t0 I .htm

## INCOME SUPPORTS

Children receiving TANF is the number and percent of children ages 0 17 who were receiving Temporary Aid to Needy Families in December 2007 and 2006. Note: 2007 state number and percent include I I children whose county is unknown; 2006 state number and percent include 3 children whose county is unknown.
SOURCE: Maine Department of Human Services, Office of Integrated Access and Support, Report: Geographic Distribution of Programs and Benefits.

Children receiving Food Stamps is the number and percent of children ages 0-17 who were receiving Food Stamp benefits in December 2007 and 2006. Note: 2007 state number and percent include 179 children whose county is unknown, who are not Maine residents, who are not in state, or who have no data; 2006 number and percent include II3 children in these same categories.

SOURCE: Maine Department of Health and Human Services, Office of Integrated Access and Support, Food Stamp Program.

State TANF and Food Stamp maximum benefit level is the dollar amount for a one-parent family of three persons (one parent, two children) covered by current-year state TANF (Temporary Aid to Needy Families) and Food Stamp benefits. For a family of three, the 2007 Federal Poverty Guideline was $\$ 17,170$ or $\$ 1,430 /$ month. In Maine, a family of three receiving $\$ 485$ in TANF benefits would receive a maximum monthly Food Stamp benefit of $\$ 426$. The combined benefit of $\$ 911 /$ month is $63.7 \%$ of the Federal Poverty Guideline for a family of three. These data represent calendar years 2007 and 2006.
SOURCE: Maine Department of Health and Human Services, Office of Integrated Access and Support. Poverty Guidelines provided in the Federal Register,Vol. 72, No. I5, January 24, 2007, pp. 3|47-3। 48.

School children receiving subsidized school lunch is the number and percent of school children receiving subsidized school lunch through the National School Lunch Program, which is a meal entitlement plan primarily funded through federal dollars. All elementary and junior high schools are required to participate in the program. In Maine, high schools have the option of participating. School children are eligible for free school lunches if their family income does not exceed I30\% of the federal poverty level. They are eligible for reduced price school lunches if their family income falls between $130 \%$ and $185 \%$ of the federal poverty level. These data represent the 2007-08 and 2006-07 school years.
SOURCE: Maine Department of Education, School Nutrition Program. http://portalx.bisoex.state.me.us/pls/doe_sfsr/eddev.ed534.ed534_parameters

Recipients of WIC benefits is the number of individuals receiving WIC (Women's, Infant's and Children's Supplemental Nutrition Program) benefits.WIC provides specific nutritious foods and nutrition education to low-income pregnant and breastfeeding women, infants, and children up to age five. Recipients must be at or below $185 \%$ of poverty and be at medical or nutritional risk. These data represent calendar years 2007 and 2006.

SOURCE: Maine Department of Health and Human Services, WIC Program.

Child support enforcement cases with collection is the number of cases for which the state child support enforcement agency successfully collected child support payments due in federal fiscal year (FFY) 2006 (October I, 2005 - September 30, 2006) and FFY 2005 (October I, 2004 - September 30, 2005). These data are also presented as a percent of the total number of cases with collection on the agency's caseload during FFY 2006 and 2007.The U.S. Department of Health and Human Services, Administration for Children and Families, Office of Child Support Enforcement defines a child support case as a parent (mother, father, or putative father) who is now or eventually may be obligated under law for the support of a child or children receiving services under the child support program, Title IV-D of the Social Security Act.

Child Support Enforcement, FY 2006: Preliminary Report, Table 4 - Statistical Program Status, FY 2006 and Child Support Enforcement, FY 2005: Preliminary Report, Table 4 - Statistical Program Status, FY 2005. http://www.acf.hhs.gov/programs/cse/pubs/2007/preliminary_report/table_4.html

## TEEN PREGNANCY

Births to single teenaged mothers is the number of births to single teenaged mothers under age 20. These data are also reported as a percent of live births. Births are reported by the mother's place of residence at the time of birth. These data represent calendar years 2005 and 2004.
SOURCE: Maine Department of Health and Human Services, Office of Data, Research and Vital Statistics.

Births to married teenaged mothers is the number of births to married teenaged mothers under age 20. These data are also reported as a percent of live births. Births are reported by the mother's place of residence at the time of birth. These data represent calendar years 2005 and 2004.
SOURCE: Maine Department of Health and Human Services, Office of Data, Research and Vital Statistics.

Repeat teen pregnancies is the number of females under age 20 who became pregnant and who had already been pregnant at least once before in their lives. These data are also reported as a percent of teen pregnancies. These data represent calendar years 2005 and 2004.
SOURCE: Maine Department of Health and Human Services, Office of Data, Research and Vital Statistics.

Births to single teens who have not completed I2 years of school is the number and rate of births to single teens ages $10-19$ who have not completed 12 years of school. The rate is per 1,000 females ages $10-19$. These data are averaged over the five-year period from 200I-2005 and from 2000-2004, and are reported by the mother's place of residence at the time of birth.
SOURCE: Maine Department of Health and Human Services, Office of Data, Research and Vital Statistics.

Teen pregnancies is the number and rate of all reported live births, induced abortions, and fetal deaths occurring to females ages $10-17$. The rate is per 1,000 females ages $10-17$. These data represent calendar years. SOURCE: Maine Department of Health and Human Services, Office of Data, Research and Vital Statistics.

## CRIME

Arrests of children is the number and rate of children ages $10-17$ arrested during calendar years 2006 and 2005. The rate is per 1,000 children ages $10-17$. The annual arrest data count all arrests of youth for offenses, including repeated offenses by the same individual.

SOURCE: Maine Department of Public Safety, Crime in Maine Reports.
http://www.state.me.us/dps/cim/crime_in_maine/cim.htm
Arrests of children for crimes against persons is the number and rate of arrests of children ages $10-17$ for crimes against persons. The rate is per 1,000 children ages $10-17$. Crimes against persons include murder and non-negligent manslaughter, forcible rape, robbery, and aggravated assault (does not include other assaults). The annual arrest data count all arrests of youth for crimes against persons, including repeated offenses by the same individual. These data represent calendar years 2006 and 2005.
SOURCE: Maine Department of Public Safety, Crime in Maine Reports.
http://www.state.me.us/dps/cim/crime_in_maine/cim.htm
Domestic assaults reported to police is the number and rate of assaults reported to police that were perpetrated by family or household members who are or were married or living together in a romantic relationship, natural parents of the same child (whether or not the couple ever lived together) or other adult family members related by blood or marriage. The rate is per 100,000 of the population. These are not unduplicated counts and may include numerous assaults affecting the same individuals. These data represent calendar years 2006 and 2005.
SOURCE: Maine Department of Public Safety, Crime in Maine Reports. http://www.state.me.us/dps/cim/crime_in_maine/cim.htm

## EDUCATION AND LEARNING

## CHILD CARE

Children served through child care subsidies is the number of children served through TANF child care, slots, and vouchers during federal fiscal year (FFY) 2007 (October I, 2006 - September 30, 2007) and FFY 2006 (October I, 2005 - September 30,2006). These data are also reported as a percent of the total number of children served through child care subsidies for each type of child care subsidy. Children up to age 12 are eligible for subsidized child care if their parents are working or in education training, and have incomes at or below $85 \%$ of the state median income.

SOURCE: Maine Department of Health and Human Services, Office of Child Care and Head Start.

Licensed child care providers, is the number of licensed child care homes, child care centers, and nursery schools in December 2007 and 2006. These data are also reported as a percent of the total number of licensed child care providers for each type of licensed child care.

SOURCE: Maine Department of Health and Human Services, Office of Child Care and Head Start.

## HEAD START

Children enrolled in Head Start programs is the number of state and federally-funded children in Head Start programs throughout the state during federal fiscal year (FFY) 2007 (October I, 2006 - September 30 2007) and FFY 2006 (October I, 2005 - September 30, 2006). Eligible children were estimated as the number of children under age 5 in poverty. Unmet need was calculated by subtracting the number of funded children from the estimate of eligible children. Note:The methodology for estimating the number of children under age 5 in poverty changed; data for 2005 is not directly comparable to data for 2004 and previous years.
SOURCE: Head Start data: Maine Department of Health and Human Services, Office of Child Care and Head Start. Children under age 5 in poverty: U.S. Census Bureau, Small Area Income and Poverty Estimates (SAIPE), 2005. http://www.census.gov/hhes/www/saipe/

## LANGUAGE MINORITY STUDENTS

Children who are English Language Learners is the number and percent of children attending public schools who are determined at the start of the school year to be limited in their ability to use English because it is not their native language. These data represent school year 2006-07. Note:The previous rate is not reported because the method for collecting and reporting the data has changed.
SOURCE: Maine Department of Education, Office of Instruction for English Language Learners.

## DROPOUTS

High school dropouts is the number and percent of students who have withdrawn or been expelled from high school before graduation or completion of a program of studies and who have not enrolled in another educational institution or program. Each local educational unit submits a dropout report to the Department of Education as of the last day of school, counting all students who dropped out during the previous school year. This calculation is referred to as an "event" dropout rate. Data represent the 2005-06 school year for public schools and private schools with $60 \%$ or more publicly-funded students. Data reported by county are for public schools only. Note: 2005-06 data are not directly comparable to 2004-05 and previous school years because the method for collecting data has changed. Also, for the 2005-06 school year all data for Cape Elizabeth has been removed due to known errors.

SOURCE: Maine Department of Education.

## DISCONNECTED YOUTH

Teens not attending school and not working is the estimated number and percent of teens ages 16-19 who are not enrolled in school (full- or part-time) and not employed (full- or part-time). These data represent calendar years.
SOURCE: U.S. Census Bureau, American Community Surveys, 2000-2006.

## GRADUATES

Public high school completion, Class of 2006 is the number and percent of students who graduated from their high school, rather than dropping out of school sometime during their high school years. A separate completion rate is calculated for each graduating class, such as the "Class of 2006." The rate is calculated by dividing the number of graduates by the number of graduates plus the number of students who dropped out during the 9th, I Oth, I Ith and I 2th grade years of this graduating class. The data represent public school graduates only. Note: 2005-06 data are not directly comparable to 2004-05 and previous school years because the method for collecting data has changed. Also, for the 2005-06 school year all data for Cape Elizabeth has been removed due to known errors. SOURCE: Maine Department of Education.

## STUDENTS WITH DISABILITIES

Students with disabilities is the number and percent of students enrolled in schools and individual education programs who are ages 3-21 and who have disabilities requiring the provision of special education services during the 2006-07 school year. The count is taken as of December I of the school year and reflects special education enrollment on that one date. The child count is completed by school administrative units, approved state operated/state supported schools, and Child Development Services sites. The percent of students receiving special education services is calculated by dividing the number of special education students by the number of regular education students enrolled in pre-kindergarten through grade 12 counted on October 1.

## Acknowledgements

The publication of the annual KIDS COUNT data book would not be possible without the cooperation of the state and non-state agencies that track the data highlighted in this report.

We would like to thank the following staff and their agencies for sharing these important data with the Maine KIDS COUNT project this year. We would also like to thank the individuals who participated in this year's KIDS COUNT Data Committee for their constructive comments and suggestions on various aspects of the data book.
